MANAGEMENT DISCUSSION AND ANALYSIS

A) Industry Structure & Development:

GP Petroleums Limited (GPPL) is one of the leading manufacturer of industrial lubricants in India and manufacturing wide range of industrial and automotive lubricants, specialties and process oils etc. under the brand name of "IPOL®" at Vasai and Daman plants. This industry has much growth potential and is growing globally.

B) Overview:

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956/2013 and made on a prudent and reasonable basis in order that the financial statements reflects a true and fair manner the form and substance of transactions and reasonably present our state of affairs and profit for the year.

The Company's Net Sales/Income from operations for the year ended 31st March, 2015 amounted to ₹ 40,728.14 lacs against ₹ 40,358.69 lacs in the previous year. The profit for the year stood at ₹ 502.61 lacs against the profit ₹ 104.25 lacs in the previous year, registering a growth of 382%.

Considering the performance of the company, the Board of Directors recommended dividend ₹ 0.10 per share @ 2% on the equity shares of ₹ 5/- each for the financial year 2014-15.

C) Industry outlook:

The public sector undertakings have dominated the Indian lubes market upto 1993 and they had a collective market share of approximately 89%, but after 1993, the Government has liberalized and decentralized the norms of import of key raw material, determination of pricing regulations and reduction in the custom duties on import of base oil. Due to liberalization policy, the fair competition took place between the private players and public sector undertakings. In today's position, around more than 20 companies are operating in the Indian lubricants market. Until the 1980, lubricants produced in the country were basically simple blends based on low and medium level technologies. More sophisticated lubricants were imported and these amounted for a very small market. The entry of multinationals has led to complex and premium brands being introduced into the Indian market. The Indian lubricants market is the fourth largest in the world.

Market Segments: There are two major segments of the lubricants industry. The automotive lubricants segment has an approximate market share of 65% and the industrial lubricants segment accounting for the rest.

Import Threat: Lubricants are usually made according to the nature of use, climatic conditions, type of road, nature of automobiles and so on. Therefore, it would not be logical to import the same in the country. But at the same time, there is not much difference and the same can be imported if one prefers to

do so. In fact, premium products, even as on today, are imported. However, in the general outlook of things, import of lubricants in India would not be competitive due to the prevailing import duty structure as well as high freight costs.

In consideration of above, it could be safely noted that the key factors to success for any company in the Lubricant industry would be:

- Good brand image.
- An extensive marketing network.
- Strong financial resources.
- Technological innovations and R&D backup.
- Strategically located manufacturing facilities.

D) Marketing Strategy:

In addition to the direct marketing efforts, the company also appoints distributors/agents for both domestic and overseas markets.

E) Business Strategy:

The Company would continue to focus on the current segments of business considering the market potential, its own inherent strength in terms of its quality, price and timely delivery. The Company has requisite infrastructure and manufacturing facilities due to its constant up-gradation/modernization and phased expansion programme.

The Company is constantly introducing new products on account of its strong in-house R&D and will continue to do the same in the near future and will also direct efforts for increasing its presence in the export markets.

SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Preparation of Financial Statements

These Financial Statement has been prepared in accordance with the generally accepted accounting principles in India under the historical cost conventions on accrual basis, except for certain tangible assets which are carried out at revalued amounts. Pursuant to Section 133 of Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules 2014, till the standard of accounting or any addendum thereto are prescribed by Central Government in consultation and recommendation of the National Financial Reporting Authority, the existing Accounting standards notified under Companies Act, 1956 shall continue to apply. All the Assets and Liabilities have been classified as Current or Non-Current, as per the Companies normal operating Cycle and other criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of the products and the time between the acquisition of Assets for processing and their realization in cash and cash equivalent, the company has ascertained its operating cycle to be 12 month for the purpose of current - noncurrent Classification of Assets and Liabilities.

B. Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that effect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

C. Fixed Assets

If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the profit and loss account. If at the balance sheet date there is identification that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount.
