MANAGEMENT DISCUSSION AND ANALYSIS

A) Industry Structure & Development:

Sah Petroleums Limited (SPL) is one of the leading manufacturer of industrial lubricants in India and manufacturing wide range of industrial and automotive lubricants, specialties and process oils etc. under the brand name of "IPOL®TM" at Vasai and Daman plants. This industry has much growth potential and is growing globally.

B) Overview:

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956/2013 and made on a prudent and reasonable basis in order that the financial statements reflects a true and fair manner the form and substance of transactions and reasonably present our state of affairs and profit for the year.

The Company's Net Sales/Income from operations for the year ended 31st March, 2014 amounted to ₹ 40,358.69 lacs as compared to ₹ 41,736.95 lacs in the previous year. The profit for the year stood at ₹ 104.25 lacs against the loss of ₹ 126.35 lacs in the previous year.

Considering the performance of the company, the Board of Directors recommended dividend ₹ 0.01 per share (0.2%) on the equity shares of ₹ 5/- each for the financial year 2013-14.

C) Industry outlook:

The public sector undertakings have dominated the Indian lubes market upto 1993 and they had a collective market share of approximately 89%, but after 1993, the Government has liberalized and decentralised the norms of import of key raw material, determination of pricing regulations and reduction in the custom duties on import of base oil. Due to liberalization policy, the fair competition took place between the private players and public sector undertakings. In today's position, around more than 20 companies are operating in the Indian lubricants market. Until the 1980, lubricants produced in the country were basically simple blends based on low and medium level technologies. More sophisticated lubricants were imported and these amounted for a very small market. The entry of multinationals has led to complex and premium brands being introduced into the Indian market. The Indian lubricants market is the fourth largest in the world.

Market Segments: There are two major segments of the lubricants industry. The automotive lubricants segment, which has an approximate market share of 65% and the industrial lubricants segment accounting for the rest.

Import Threat: Lubricants are usually made according to the nature of use, climatic conditions, type of road, nature of automobiles and so on. Therefore, it would not be logical to import the same in the country. But at the same time, there is not much difference and the same can be imported if one prefers to

do so. In fact, premium products, even as on today, are imported. However, in the general outlook of things, import of lubricants in India would not be competitive due to the prevailing import duty structure as well as high freight costs.

In consideration of above, it could be safely noted that the key factors to success for any company in the Lubricant industry would be:

- Good brand image.
- An extensive marketing network.
- Strong financial resources.
- Technological innovations and R&D backup.
- Strategically located manufacturing facilities.

D) Marketing Strategy:

In addition to the direct marketing efforts, the company also appoints distributors/agents for both domestic and overseas markets.

E) Business Strategy:

The Company would continue to focus on the current segments of business considering the market potential, its own inherent strength in terms of its quality, price and timely delivery. The Company has requisite infrastructure and manufacturing facilities due to its constant upgradation/modernization and phased expansion programme.

The Company is constantly introducing new products on account of its strong in-house R&D and will continue to do the same in the near future and will also direct efforts for increasing its presence in the export markets.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Preparation of Financial Statements

These financial statements have been prepared to comply with Accounting Principles Generally accepted in India (Indian GAAP), the Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006 and the relevant provisions of the Companies Act, 1956.

The financial statements are prepared on accrual basis under the historical cost convention, except for certain fixed assets which are carried at revalued amounts.

B. Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that effect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

C. Fixed Assets

Fixed Assets are stated at their original cost except certain Fixed Assets which are adjusted for revaluation.

D. Depreciation

Depreciation on Fixed Assets has been provided on "Straight Line Method" at the rates and in the manner specified in Schedule XIV of the Companies Act, 1956. Depreciation on account of enhancement in the value of certain Fixed Assets on account of revaluation is adjusted against Revaluation Reserve.

E. Impairment of Assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the profit and loss account. If at the balance sheet date there is identification that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount.

F. Investment

Current Investments are valued at lower of cost and fair value. Fair value of investments in mutual funds are determined on portfolio basis.

G. Inventories

1. Inventories are valued at lower of cost and net realisable value. Costs comprise all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. The excise duty in respect of closing inventory of finished goods is included as part of finished goods.
2. Moulds are amortized over a period of three years.

H. Revenue Recognition

Sales are recognized when goods are invoiced on dispatch to customers and are recorded inclusive of Excise duty but are net of trade discount and Sales Tax.

Dividend income is recognized when right to receive is established.

Interest Income is recognized on time proportion basis taking into account the amount outstanding and rate applicable.

I. Expenditure Recognition

Expenses are accounted for on accrual basis and provision is made for all known losses and liabilities.

J. Research and Development

Capital expenditure on Research and Development (R & D) is included in fixed assets under appropriate heads and revenue expenditure on R & D is charged as expenditure in the year in which it is incurred.

K. Foreign Currency Transactions

1. Transactions in foreign currency are recorded at the exchange rate prevailing at the time of the transaction.
2. Monetary items denominated in foreign currencies at the year end are restated at year end rates. In case of monetary items which are covered by forward exchange contracts, the difference between the year end rate and rate on the date of the contract is recognized as exchange difference and the premium paid on forward contracts is recognized over the life of the contract.
3. Any income or expense on account of exchange difference either on settlement or on translation is recognized in the Profit & Loss Account.

L. Retirement and other Employee's Benefit

1. Retirement benefits in the form of Provident Fund & Superannuation Fund is a defined contribution scheme and the contributions are charged to the Profit & Loss Account of the year when the contributions to the respective funds are due. The Company has no other obligation other than the contributions payable.
2. Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on Projected Unit Credit Method calculated at the end of each financial year.
3. Leave encashment liability is provided for based on actuarial valuation done as per Projected Unit Credit Method calculated at the end of each financial year.
4. Actuarial gains / losses are immediately taken to profit and loss account and are not deferred.

M. Taxation

The current charge for Income Tax is calculated in accordance with the relevant tax regulations applicable to the Company.

Deferred Tax is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and are capable of reversal in subsequent periods, subject to consideration of prudence.

In case the Company is liable to pay income tax u/s 115JB of Income Tax Act, 1961 (i.e. MAT), the amount of tax paid in excess of normal income tax is recognised as an asset (MAT Credit Entitlement) only if there is convincing evidence for realisation of such asset during the specified period. MAT credit entitlement is reviewed at each Balance Sheet date.

N. Segment Reporting

The Company is engaged mainly in Manufacturing of Industrial Oils & Lubricants and as such it is the only reportable segment as per Accounting Standard (AS 17) on Segment Reporting. The geographical segmentation is not relevant as export turnover is not significant in respect to total turnover.

O. Provision / Contingencies

A provision is recognised when there is a present obligation as a result of past event, and it is probable that an outflow of resources will be required to settle the obligation and in respect of which a reliable estimate can be made. Provisions are determined (as provided/charged to the Statement of Profit & Loss) based on the estimate of the amount required to settle the obligation at the Balance Sheet Date and are not discounted to its present value.

Contingent Liabilities are not recognized but are disclosed in the financial statements. Claims against the Company where the possibility of materialization is remote are not considered as contingent liabilities.
