Company Profile

GP Petroleums Limited, a public limited and ISO certified Company, is primarily into formulating, manufacturing and marketing of industrial, automotive lubricants, process oils, transformer oils, greases, and other specialties under the brand name "IPOL" in India for 5 decades. The Company is also listed on Nationwide Stock Exchanges viz. BSE Limited and the National Stock Exchange of India Limited.

The brand IPOL is a trusted name since 1973 and is well accepted by customers and is a popular name in the Industrial and Rubber industry.

The Company has a manufacturing facility at Vasai, near Mumbai, which has a base oil storage capacity of 15000 MT and has a blending capacity to churn out 80000 KL of lubricants annually. The Company is fortified with modern manufacturing and packing facility supported by well equipped laboratory which ensures consistent quality.

IPOL offers wide range of products for wide range of applications. It covers up to 90% of the lubrication requirement through the wide spectrum of generic-to-bespoke solutions. These are made available in a variety of pack sizes as per the market needs. The products had several contemporary national and international performance specifications and approvals such as API, JASO, ACEA and other OEM credentials.

The Industrial sector of the Company has expanded into several new industries, including ceramics, plastic, and sugar. With the development of the latest semi-synthetic coolant and some of the highest-performance neat cutting oils, the market for metalworking fluids has been further strengthened. The product line has expanded with the introduction of a variety of high-performance greases aimed at steel and sponge iron industries. For the past 49 years, IPOL has been the leading brand in the industrial sector and has earned customers' trust. Aqua cut 125, soluble cutting oil from IPOL, is a favourite among business clients. In the machine tool and injection moulding machine industries, the Company has obtained numerous OEM approvals.

The Rubber Process Oil segment of the Company caters to two categories of customers-Tyre and Non-Tyre. Tyre manufacturers make 70% of the pie and are the major consumers of process oils. The Company's products are approved by all leading tyre manufacturers in the country. In Non-Tyre sector, the Company has a unique distinction of making bespoke products as per the needs of the customers. For any new application, IPOL is the preferred choice. The Company exports these products to over 12 countries across the globe and increasing its footprint day by day.

In 2007, when European Union came with the legislation of banning carcinogenic products being used in tyres, Company was the pioneer to introduce low PCA (Polycyclic Aromatic compounds) for supporting tyre companies involved in exports to Europe and even today continue to command a significant share of this segment. The automobile industry looks very promising and is poised to have a robust CAGR of 4% during 2022-27. These augers well for the tyre industry and hence the demand for process oils.

The Company has furthered base oil trading during the year to keep the books in good shape as the manufacturing business was going slow due to the partial lockdown scenario. Trading also enables supply chain efficiencies for the manufacturing business through increase in parcel size of imports thereby providing allied benefits in pricing and leveraging efficiencies.

The Company is working towards tie ups with local and global refineries to ensure uninterrupted base oil supplies.

The Company has a strategic tie-up with Spanish energy major Repsol since 2016, to exclusively manufacture and market Repsol branded, premium quality lubricants across India and accordingly the Company has significantly increased its footprint in the premium Automotive lubricants market.

Headquartered in Madrid, Repsol is a global and integrated Company, present along the entire value chain. Repsol is one of the world's leading publicly traded oil and Gas Companies. The Company operates in the areas with the most energy potential around the world and has one of the most efficient refining systems in Europe. Repsol is present in 37 countries employing over 24,000 people. The Company has business activity across the entire value chain, including hydrocarbon exploration and production, refining, transport, chemicals, service stations and the development of new energy solutions.

Repsol branded products come with added benefits and special features that caters to the premium and top-end segments across markets in the country.

REPSOL lubricants are developed in the state-of-the-art global R&D centre in Spain. These formulations are produced by GP Petroleums Ltd in its own manufacturing plant at Vasai near Mumbai, for the benefit of India, with modern testing facilities, in accordance with the stringent quality standards, certified by Repsol S A, Spain.

The Company had launched co-branded product Honda Repsol "MOTO BIKER" & "MOTO SCOOTER" Engine Oil in India, which is manufactured and marketed by GP Petroleums, exclusively formulated for Honda's two-wheelers. This partnership has marked entry of GP Petroleums into the OEM driven co-branded two-wheeler lubricant segment.

GP Petroleums Limited looks forward to exciting activity in the Indian Automotive lube space together with Repsol and support the Make in India initiative by manufacturing Repsol lubricants in our plants in India.

VISION

From the Chairman's Desk

Dear Shareholders,

Greetings!

At the outset, I hope you and your family are doing well and taking good care of yourselves. I want to thank everyone who has been a part of this adventure with GP Petroleums family throughout the years. This is a historic event, and I am honoured to be chairing the Company with the Brand 'IPOL', which is celebrating its Golden Jubilee this year! The year also marked the entry of GP Petroleums in the Fortune The Next 500 Companies, adding further to the celebrations!

In the year gone by, the Lubricant Industry faced numerous challenges impacting the general business environment. Your Company was no exception to this. I would like to call them the 10 Cs: Chip shortages causing disruptions in automobile manufacturing, COVID-19 pandemic resurfacing in many variations and waves, Conflicts in Europe causing stagflation, Containers shortages affecting raw material movements, Crude oil price escalation, Currency inflation, Capital availability becoming increasingly tight impacting the channel and customers, Credit lines drying up - restricting expansion opportunities, Capital expenditure cycle on the backbench in the auto industry owing to the uncertain future of ICE technology, and finally, heightened Competition from foreign MNC's, Public Sector Undertakings and local and regional players alike.

The automotive industry's downturn has a direct impact on the manufacturing sector, and hence on the lubricant business.

The pandemic learnings from the previous year were tremendously useful in formulating a growth plan. Your company renegotiated contract terms with vendors, and adopted a 'responsible-sales' strategy, thereby assisting clients in these trying circumstances and supporting them in ensuring uninterrupted production. Your company also aided the trade channel in reducing inventories and providing trade financing support.

GP's decision to partner with non-banking financial institutions for distributor financing resulted in better cash flows for the Company, with such institutions now accounting for 30% of its automotive business.

Despite various volatile business circumstances, I am proud to say that your Company not only overcame these but has also demonstrated a great resilience and flexibility, allowing it to retain the turf by delivering higher revenues, PAT, PBT and the overall performance in all its segments. Our GP team rose to the occasion and performed admirably and passionately.

As a part of the 'eXcelerate' strategy, your Company expanded its distribution network and entered new horizons of growth. In Industrial business segments, your Company entered into diversified verticals thereby de-risking the business which was primarily reliant on conventional industrial segments. The Company is presently concentrating its efforts on the Sugar industry, Plastic injection molding industry, Thermic fluids, Steel Tube mills, Sponge Iron and process industries. Having gained the width, going forward, we will focus on depth, expanding product portfolio in these newer segments. The emphasis on de-risking the business, responsible sales and profitable sectors, supplemented by trading for opportunity maximisation, kept the accounts in good shape.

Despite the strong headwinds, we remain optimistic about our business growth and aim to be one of the industry's fastest-growing players. As the year progresses, we anticipate growing demand from industries in the B2B sector as well as in tier 2, tier 3 towns in the B2C sector. We have a strong presence in these sectors and geographies as a consequence of our strategic expansion.

The Company has an efficient blend plant at Vasai, near Mumbai, having production capacity of 80,000 KL and base oil storage of 15,000 MT, one of the largest in the industry.

We boosted the top line by 18% to ₹ 718 Crores and the bottom line by 11.6% to ₹ 26.4 Crores in FY 22. Regardless of the challenges, this demonstrates the team's commitment to growth and enhancing investor value.

Your Company has been named as one of India's Emerging Companies in the coveted Fortune India Next 500 list for 2022! The award honours mid-sized firms for their excellent achievements.

Your Company remains passionate, as well, for the cause of society in which it operates. On the Corporate Social Responsibility front, under the 'WE CARE' platform, your Company has undertaken various programs for the differently privileged sections of the society. Your Company has conducted Health check-up camps in 13 locations across the country which has benefited more than 850 people with free distribution of eye-glasses and free medical checkup. Over the last two years, your Company has provided the health checkup facility to over 4500 people from different walks of life. Your Company has also encouraged women empowerment by distributing sewing machines to the women who were looking for livelihood to support their families.

Finally, on behalf of the Board, I thank all the shareholders, stakeholders, business partners, Central and State Governments, Regulatory Authorities and others, for their cooperation, continued support and faith reposed in the Company. I would also like to thank every GPPL employee for being an unshakable pillar of strength and personifying relentless commitment to our core values by demonstrating their sincerity, efforts, perseverance and dedication. I look forward to your continued trust, confidence and support to the Company.

Best Wishes,

Ayush Goel
Chairman

Management Discussion and Analysis Report

Pursuant to Schedule V to the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, a Management Discussion and Analysis Report covering business performance and outlook (within limits set by Company's competitive position) is given below:

INDUSTRY STRUCTURE & DEVELOPMENTS

The Indian lubricant market is the world's third largest after United States and China, accounting for nearly 7% of global lubricant demand and has been growing at 3% over the past decade prior to the pandemic. The market size is estimated to be 2.9 million tonnes, with the industrial segment accounting for more than half of demand. The lubricants market is highly competitive and fragmented with National Oil Companies, several international majors, and a plethora of local Companies vying for a piece of pie. The Lubricants Industry is expected to grow at CAGR of 5.6% for the next 5 years.

Stronger emission standards and increased demand for fuel efficiency are driving OEMs to develop new engine technology at a faster pace. Rising crude oil prices has impacted every geography and India is no exception. The Company had to go through numerous challenges under highly uncertain global environment to maintain smooth business operations. Irrespective of the situation, the Company has generated investor value through strategic sourcing, maintaining service and quality standards, bespoke solutions to the Customers and building efficiency in processes and at organizational level.

COMPANY'S COMPETITIVE POSITION

GP Petroleums' homegrown iconic brand IPOL, launched in 1973, has entered the prime 50th year of successful operations in the Indian lubricants market. It is one of the exceedingly rare 'Made in India' brand which has grown relentlessly, amidst competition from foreign MNC's and large government companies, facing numerous onslaughts from the market.

The Company specializes in the formulation, blending and marketing of Industrial and Automotive Lubricants, Rubber Process Oils, Greases and other specialty products. Across the country, the Company has a well-established network of over 500 Distributors and 20 warehouses spread among 24 states and 3 union territories covering more than 350 locations and exports to more than 12 countries.

PAN India presence of GP Petroleums Ltd

The Company's in-house blending and storage capacity is one of the key strengths that has helped it maintain steady supplies. During the lockdown, the Company was able to maintain uninterrupted supplies to essential sectors - like Western Coal Fields, Sugar industries and many others.

GP Petroleums has an efficient manufacturing facility, which spreads across 9000 plus sq. m., having production capacity of 80,000 KL and Base Oil storage of 15,000 MT which is one of the largest in the industry. The plant is supported by an advanced laboratory, located at Vasai, near Mumbai. The plant caters to pan-India and export requirements.

GPPL is associated with test houses like AVL, ARAI and ICAT for the product performance studies for Automotive Lubricants. The plant is well geared up to accommodate the growth agenda for next 5 years.

GP Petroleums is in collaboration with leading Additive and Chemical manufacturers for co-development of advanced lubricants for the ever-changing requirements.

The increasing demand from end-user industries is notably driving the market growth in India. The Company's agenda is to contribute to the same and achieve the targets that it has set for itself.

The Company is driving Growth on the strength of its uniqueness in being a technology-led portfolio player, learnings from five decades of existence, and the proof of the success in this journey is evident as the Company entered into the **'Fortune India The Next 500 – India's Emerging Companies'** list.

Mr. Prashanth Achar, CEO (Right) receiving the prestigious certificate The Next 500 – India's Emerging Companies - 'Fortune India'

SEGMENT-WISE PERFORMANCE

Industrial Lubricants: The Industrial business vertical is well-known for its quality products and bespoke solutions, over the last 5 decades. The Industrial segment has entered into new business segments and expanded its distribution network base as a part of the Company's 'eXcelerate' strategy. The Industrial business has proliferated into Sugar industry, Thermic Fluids, Steel Tube Mills, Plastic Injection Molding Industry, Sponge Iron, Ceramic, Cement, Plastimix, Textile and Process Industries. Going ahead, the Company plans to focus on expanding further with newer product portfolio.

Agility is at the core of the Company's values. GPPL holds a distinct advantage as a 'one-stop solution provider' with the whole gamut of the quality portfolio that has led to market leading business shares in Metal Removal Fluids. The quality portfolio coupled with vintage partnerships with customers and distributors create the moat.

The 3Is - Incubate, Innovate and Integrate is the mantra in formulating bespoke solutions. Working alongside the leading additive manufacturers, Company has launched future-ready solutions. The Company had developed segment specific solutions, to mention a few - Oil for Textile industry, Specialty Greases for Sugar Industry and Semi Synthetic Metal Working Fluids. Cutting oil offer 'IPOL Aqua cut' has a cult status among the industrial customers with five decades of learning curve.

Rubber Process Oils: GP Petroleums is considered as the No. 1 private player in Rubber Process Oils and gets consumed in the manufacture of one in every 15 tyres. GPPL is also a pioneer in low Poly Cyclic Aromatic (PCA) Rubber Processing Oils and has forged a partnership with most of the leading tyre manufacturers. The Company plans to introduce new non-carcinogenic products. The strategy of providing bespoke solutions has helped the Company maintain its market leadership position. The RPO exports in revenue terms has grown up by 52%.

Automotive Lubricants: GP Petroleums automotive division aims to grow the business exponentially on the strength of twin Brands - IPOL and Repsol. The division is committed to increase geographical presence on a larger scale and has plans to enter into newer territories. Automotive division's - business strategy 'LASKHYA' is all about proliferation through 3Rs - Reach, Range and Retain.

Automotive vertical has launched several products fortifying its portfolio from BS VI compliant Motorcycle Oils, Fully-synthetic engine and gear oils, low viscosity engine oils, CK-4 oils are some of the examples.

GP Petroleums has an exclusive partnership with Repsol SA - Spain's global energy Company, to manufacture and market REPSOL branded lubricants in India and Southeast Asia from the year 2016. On the strength of the Brand building so far, Repsol and GP Petroleums have renewed the partnership for the next 5 years. Repsol is well known for its association with Moto GP - the premier motorcycling championship

with Honda for the past 27 years. Closer home, in 2020, GPPL entered a tri-partite agreement with Repsol and Honda Motors and Scooters India Ltd (HMSI) for manufacturing and marketing Repsol-Honda Co-branded Lubricants.

The B2C growth of GP Petroleums hinges on doubling the retail footprint with the weighted distribution model and RTM - Route to Market interventions like D2D (Direct to Dealer) model and Omni-channel workforce that the Company has embarked upon. New growth drivers having an immense potential are new-age tractors, SUVs and Scooter segment.

OPPORTUNITIES & THREATS

At GP Petroleums, the R&D doesn't work in the closed confines of the laboratory but in the open, at the 'Customers' place. The tribology takes over subsequently to generate new solutions to be abreast with the ever-changing market requirements.

Technology upgradation has paved the way for development of critical solutions, which have been upheld by customers. Specialty Greases for automotive components like the low temperature Greases, Grease with life of 1,00,000 KM, Specialty Rust Preventives, Fire Resistant Hydraulic Fluid for mining sector, Deep hole drilling and Broaching oil with Ester-based technology and Aqueous Polymer Quenchant are few that are developed to address the market needs. The Chuck Jaw Greases, Master mix special oils, Mist Oils, Plunger Lubricants were introduced during the year.

The rapidly changing machining technology calls for new tribology that is efficient. GPPL's products with BS-VI specifications help in lowering the carbon footprint. The ARTEC series of Rubber Process Oils are non-carcinogenic and much sought after in the tyre industry.

OPPORTUNITIES

GP Petroleums has a long standing of five decades which has created trust deposit with the customers. The product quality and the service parameters along with customer training and bespoke solutions do add to the advantage. In inflationary environment, everyone suffers. However, GP Petroleums tends to be impacted less as our products come with fair sticker price, our value proposition being '**Right Quality at Right Price**'.

In Industrial segment, the Company has robust plans to enter in new segments like - Mining, Infrastructure, Construction, Textile, Plastic, Paper, Cement, Chemicals, Glass and Ceramic for growth.

Building on the existing overseas customers, export opportunity is being pursued with focus.

Brand IPOL, REPSOL and the newly launched Honda-Repsol Co-brand helps to meet the requirement of all the customer segments and demographics, and at various price points.

THREATS

The Raw material cost escalation and the Forex hardening impacts the Lubricant industry. The heightened competition puts pressure on pricing. Every cost line is on the rise given the inflationary trends while the demand is likely to taper due to delay in Capex cycle.

The technical advancement of products paving the enhancement in quality and at the same time reduction in quantity is like a double-edged sword threatening the lubricants industry.

EVs' impact on the lubricant industry is a foregone conclusion, in the long run. EVs are forecasted to have a considerable play in 3W and 2W space apart from the public transport. EVs have considerably lower number of parts and hence lower will be the consumption of Industrial lubricants.

200 million vehicles ply on 6 million km of Indian roads and nearly a third of this fleet is less than five years old. India will continue to add 20 million vehicles year after year. All these vehicles will require to be lubricated – through their entire life cycle – from the beginning of the production through the end-of-service life. So, as per the experts, the industry will shrink but outlive the ICE and has a life span of another 15 years at the minimum.

RISKS AND CONCERNS

Risk is an integral part of business and should be managed through identification, assessment and mitigation of potential risks. At GP Petroleums, our core values play a pivotal role, shaping the organizational integrity and bringing uprightness in business actions.

Though the risks related with pandemic, surge in infections, variant mutants are eased out with a massive vaccination drive covering the entire population, yet other risks related to business environment continue. Few of the major risk hampering business are mentioned here. Risk due to inflationary input costs, raw material supply fluctuations at global level, technology obsolescence risk, slowing of automobile industry, increased competition from regional players, network retention, risk of liquidity crunch affecting the cash flow, credit exposure to distributors, volatility in dollar rate, talent retention risk.

The Company has managed the risks, through assessing its impact with appropriate mitigation plans. The growth intensive 'eXcelerate' strategy along with the austerity measures and efficiency and effectiveness programs have led to the coverage of business risks at large. Health, Safety, Security and Environment (HSSE) risks are significant and critical areas of focus with a team assigned to drive it. The Company's Risk Management Committee carries a regular risk prognosis to ensure that robust risks management system is in place.

FUTURE OUTLOOK

The business environment is showing green shoots after being hit by the pandemic. Though the aftermath effects are visible now, yet the business indicators show a better picture as compared to earlier years. The demand drivers and the proliferation of distributor network work as the base indicators.

The outlook appears promising as we move ahead, which will be driven by numerous business factors (internal) and the government policies and market forces (external). The demand and supply in lubricants industry is largely dependent upon the changing economic and regulatory landscape. The government's policy decision on sops for the automobile industry, vehicle population, the growth of automobile and tyre industry will largely have bearing on automobile and Rubber process oil business verticals, while manufacturing activity, mining and other business will lead to the lubricants demand generation.

Superior monsoon prospects and increase in agri-activities, farm output, increase in tractor sales, higher disposable income in tier 2 and tier 3 towns, is likely to ensure heightened demand for automotive lubricants.

The growth in demand for tyre and rubber products and increase in exports opportunity have created prospects for RPO business. The government's policy of 'Atma-Nirbhar Bharat' and 'Made in India' in addition to curb on imports have bolstered growth in the tyre industry.

The Company is bullish about the growth through and aims to be one of the fastest growing players in each of the profitable segments.

NEW PRODUCTS & OPPORTUNITIES

Automotive (Business to customer)

- Launched new Lubricants to meet new environment norms & BS VI.
- New launch in passenger cars category with fully synthetic variants.
- New Launch in Motorcycle category - Fully synthetic – lower viscosity variant.
- Fully synthetic gear oil meeting specifications of GL 5.
- Ashless, Zn free gas engine oil for stationary engines.

Industrial / Rubber Process (B2B)

- Multi metal, semi synthetic metal and working fluids for Auto component manufacturing.
- Cutting edge Surface active micellar anionic emulsifier technology developed for soluble cutting oil.
- High performance rust preventives for export application with 6 months of outdoor protection.
- Tailor made barium free additive developed for Rust preventives.
- Chuck Jaw grease for specialist segment.
- Plunger Lubricants.
- Mist Oils.
- Master mix specialty products with high performance slip seal grease for industrial applications.
- Naphthenic & highly paraffinic based product range for RPO to support OEM requirement

- Refrigeration oil for chilling units.
- Vacuum oil for vacuum pumps.

HUMAN RESOURCES AND INDUSTRIAL RELATIONS

GP Petroleums PATH value framework, which stands for Passion, Agility, Thinking Big and Honesty, serves as its compass. Employees are Company's greatest asset since they have functional knowledge, industry expertise and are good team players. The Company is on track to become the 'Employer of Choice' among Indian Lubricant players. The employee strength of the Company is 274 for the year ending March 2022. The Extended Leadership Team feeds into the succession planning hopper. For the purpose of identifying and developing high potential across levels, the Company has set up a distinct team called "Innovation Catalyst".

The Company offers variety of benefits to its employees and also focuses on their safety by conducting various trainings. For the benefit of high potential employees, the Company gives cross-functional exposure through lateral shifts and project exposure. The company, through the empower series, is constantly educating customers on right lubricant usage for safety and savings.

The Company is driven by 'Performance Culture' where employees are persuaded to take risks. A Health, Safety, Security and Environment (HSSE) policy for the Company is in place and is relevant to all employees, including contractors. It upholds the highest occupational HSSE requirements and conduct regular reviews of safety performance to correct any flaws.

The Company gives the adoption of modern HR techniques with the utmost attention in order to increase overall staff effectiveness. The Company has a POSH Committee to safeguard the women employees from sexual harassment at work. The Company has not received any complaint relating to the same. All legal compliances have been properly met by the Company. The compliance is aided by the routine auditing and gap analysis process. The Company has kept friendly working relationships and resolved the majority of labour disputes amicably. To help its employees advance from semi-skilled to skilled workers, the Company provides skill development programmes on regular basis.

Health and mental wellbeing sessions are held on a regular basis. A lot of enjoyable activities are introduced to create GPPL a great workplace. To foster a culture of professionalism, each employee receives individual attention and is considered as a member of the GPPL family.

"Play for Profit\$ with Passion" is the mantra that has ensured that the culture is informal, transparent and respectful.

We Care!, a Corporate Social Responsibility initiative, is still going strong and supporting differently privileged communities. The Company has undertaken various programs for the differently privileged sections of the society like Health check-up camps in 13 locations across the country which benefited more than 850 people with free distribution of eye-glasses and free medical checkup. Over the last two years, your Company has provided the health checkup facility to over 4500 people from different walks of life. Your Company has also encouraged women empowerment by distributing sewing machines to the women who were looking for livelihood to support their families.

We Care! CSR initiatives by GP Petroleums Limited

INTERNAL FINANCIAL CONTROL AND THEIR ADEQUACY

Company's Internal Control System has been designed to provide for accurate recording of transactions with internal checks and prompt reporting, adherence to applicable Accounting Standards and Policies, compliance with applicable statutes, policies and procedures, guidelines and authorisations. Consequent to the implementation of the Companies Act, 2013 (the Act), the Company has complied with the specific requirements in terms of Section 134 (5)(e) of the Act, calling for the establishment and implementation of Internal Financial Control Framework that supports compliance with the requirements of the Act in relation to Directors' Responsibility Statement. The Company has an independent internal audit function with extensive internal audit programme and periodic review by the management and Audit Committee. During the year, the controls were tested and no reportable material weakness in the design or operation was observed.

DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

During the FY 2021-22, the Company has registered highest Revenue from Operations of ₹ 718 Crores as against ₹ 610 Crores in the previous financial year, registering a growth of 18%. The Company's Profit before taxes for FY 2021-22 was higher by 11.6% at ₹ 26.40 Crores as against ₹ 23.60 Crores in previous year. This has also been the highest PBT for the Company till date. Profit after taxes for the year increased by 6.8% over previous year to ₹ 18.9 Crores as against ₹ 17.7 Crores. The debt cost reduced by ₹ 1.5 Crores on account of judicious working capital management. In spite of rising crude prices in the previous year amidst the Russia - Ukraine war and ongoing COVID crisis, the Company managed a decent growth maintaining the margins during the year.

CHANGES IN KEY FINANCIAL RATIOS

Details of significant changes (i.e. change of 25% or more as compared to the immediately previous financial year) in key financial ratios, along with explanations therefore, including:

Particulars	Unit	2020-21	2021-22	% Change
Debtors Turnover	Times	6.9	6.9	+1%
Inventory Turnover	Times	4.5	4.9	+8%
Interest Coverage Ratio	Times	4.9	8.1	+67%
Current Ratio	Times	2	3.9	+100%
Debt Equity Ratio	Times	0.5	0.1	(73)%
Operating Profit Margin %	%	4.4	4.2	(6)%
Net Profit Margin %	%	3.9	3.7	(5)%
Return on Net worth	%	10.1	10.5	+4%

Debtors Turnover Ratio indicates Company's effectiveness in collecting its revenue from customers. It is computed by dividing the revenue from operations by average trade receivables. The ratio has marginally improved over the last year indicating better collections and debtors management.

Inventory Turnover Ratio indicates the number of times a Company has sold and replaced its Inventory during the year. It is calculated by dividing the cost of goods sold by average inventory. The ratio has improved over the last year which indicates more efficient inventory management.

Interest Coverage Ratio is a debt and profitability ratio used to determine how easily a Company can pay interest on its outstanding debt. It is calculated by dividing EBIT by the Interest Expenses. The ratio has increased by 67% in F.Y. 2021-22 showing the Company's ability to pay the interest expenses easily due to higher EBIT and lower interest expenses. This was achieved because of efficient working capital management.

Current Ratio is a liquidity ratio that measures Company's ability to pay short term obligations or those due within twelve months. It is calculated by dividing the Current Assets by Current Liabilities. A Current Ratio of 2 and above is an indication of financial soundness of a business concern.

Debt Equity Ratio - Since the Company does not have long term borrowings, Debt Equity Ratio has been calculated for the short-term debts and lease liabilities. It is a measure of short term debts plus lease liabilities divided by the total equity. The debt equity ratio has decreased indicating lower borrowings and efficient debt management.

Operating Profit Margin is a Profitability Ratio used to calculate the percentage of profit a Company produces from its operations. It is calculated by dividing the Operating profit by revenue from operations. The Operating Profit Margin in FY 2021-22 has marginally reduced due to some bad debts provisioning because of certain debts not realizable as a result of the impact of the pandemic on some entities.

Net Profit Margin is a Profitability Ratio used to calculate the percentage of Net Profit Before Tax earned by a Company during the year. It is calculated by dividing the Net Profit Before Tax by the Revenue from Operations. The Net Profit margin of the Company has reduced marginally from the last year because of the impact of the bad debts provisioning.

Return on Net Worth is a measure of profitability of a Company expressed in percentage. It is calculated by dividing Profit before Tax by Shareholders Equity. There is an improvement compared to the previous year implying that the Company is increasing its ability to generate profit and has used the shareholders' equity more efficiently. In short, the Company is growing.

Independent Auditor's Report

TO
THE MEMBERS OF
GP PETROLEUMS LIMITED

Report on the Audit of the Financial Statements Opinion

We have audited the accompanying financial statements of GP PETROLEUMS LIMITED (the "Company"), which comprise the Balance Sheet as at March 31, 2022, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows ended on that date, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as the "financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2022, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing ("SA's") specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters ("KAM") are those matters that, in our professional judgement, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

There is no Key Audit Matters requiring information to the members of the company.

Emphasis of Matter

There is no Emphasis of Matter requiring information to the members of the company

Our opinion is not modified in respect of this matter.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibilities for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as-a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures

in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of GP Petroleums Limited of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **GP PETROLEUMS LIMITED** (the "Company") as of March 31, 2022, in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the ICAI and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control

based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal financial control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI. The Internal control weakness observed in the handling of material lying at third party location, consequent upon detection of

fraud, has been cured by the management by strengthening the process for such handling.

Authorization of Financial Statements

The audited Annual Financial Statements along with Notes to Accounts and Statutory Auditor's Report thereon are adopted and approved by Board in its Meeting held on May 30, 2022.

1B. Significant Accounting Policies

A) Basis of preparation and presentation of financial statements

The Company's financial statements for the year ended March 31, 2022 have been prepared in accordance with Indian Accounting Standards (Ind AS) prescribed, under Section 133 of Companies Act, 2013 read with The Companies (Indian Accounting Standards) Rules as amended from time to time.

The financial statements are prepared on the basis of going concern under the historical cost convention using the accrual method of accounting, except for the following items: -

Items	Basis of measurement
Land and Building	Measured at Fair Value upon transition to Ind AS and thereafter at cost less Depreciation & Impairment.
Defined Benefit Plan	Plan assets are Measured at Fair Value
Mutual Fund Investments	Measured at Fair Value
Lease except short term and low value	Measured at Fair Value
Financial Assets and Financial Liabilities	Measured at Fair Value

The financial statements are presented in Indian Rupees (₹), which is also the Company's functional currency. All amounts have been rounded-off in Lakhs with upto 2 decimal points, unless otherwise stated.

Current Vs Non – Current Classification

All the Assets and Liabilities have been classified as Current or Non – Current as per the Company's normal operating cycle and other criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of the products and the time between the acquisition of Assets for processing and their realization in cash or cash equivalent, the Company has ascertained its operating cycle to be 12 months for the purpose of current – non-current classification of Assets and Liabilities.

An asset is treated as Current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle – 12 months in this case
- Held primarily for the purpose of Trading, or
- Cash or Cash Equivalent unless restricted from being used to settle a liability for atleast 12 months after the reporting period

All other assets are classified as Non – Current Assets.

Notes to Financial Statements for the year ended March 31, 2022

A liability is treated as Current when it is:

- Expected to be settled in the normal operating cycle - 12 months in this case
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as Non – Current Liabilities.

Deferred Tax Assets/ Liabilities are classified as Non-current on net basis.

On transition to Ind AS, the Company has elected to use the exemption available under Ind AS 101 to continue with the carrying value of all its PPE & Investment Property recognized as at April 1, 2016 (transition date) except land and building measured at Fair Value as deemed cost and use that as its deemed cost as at date of transition.

Measurement and Recognition

After initial recognition, items of Property Plant & Equipment (PPE) are shown at cost less accumulated depreciation and any accumulated impairment losses.

B) Use of Estimates and Judgements

The preparation of financial statements requires management to make estimates, assumptions and judgements that affect the reported balances of assets and liabilities and disclosures as at the date of the financial statements and the reported amounts of income and expenditure for the periods presented. Actual results may differ from the estimates considering different assumptions and conditions.

Estimates and underlying assumptions are reviewed on an ongoing basis. Impact on account of revisions to accounting estimates are recognized in the period in which the estimates are revised, and future periods are affected.

Estimation of uncertainties relating to the global health pandemic from COVID-19

The Company has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of receivables, unbilled revenues. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of this pandemic, the company, as at the date of approval of these financial statements has used internal and external sources of information including credit reports and related information, economic forecasts. The company performed sensitivity analysis on the assumptions used and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of the annual financial statements.

The following are the key assumptions concerning the future, and other key sources of estimating uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year :

- a) Useful lives and Residual Values of Property, Plant and Equipment, Investment Property and Intangible Assets;
- b) Fair Value Measurements of Financial Instruments ;
- c) Impairment of Non-Financial Assets;
- d) Income Taxes;
- e) Defined Benefit Plans
- f) Provisions;
- g) Valuation of Inventories;
- h) Contingencies

Notes to Financial Statements for the year ended March 31, 2022

C) Measurement of Fair Values

The Company's accounting policies and disclosures require the measurement of fair values, for both financial assets and liabilities.

Fair Value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the assets or liability

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy that categorizes into three levels, described as follows, the inputs to valuation techniques used to measure value. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 inputs) and lowest priority to Unobservable inputs (Level 3 inputs).

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

D) Property, Plant and Equipment (PPE)

Recognition and Measurement

Land is carried at cost. Other items of PPE are measured on initial recognition at cost net of taxes/duties, credits availed, if any, and any costs directly attributable to bringing the asset into the location. Subsequently the items of PPE are carried at cost less accumulated depreciation and accumulated impairment losses, if any, as prescribed in Ind AS 16.

The cost of PPE includes borrowing costs directly attributable to acquisition, construction or production of qualifying assets. Qualifying assets are assets which necessarily take a substantial period of time to get ready for its intended use.

The useful lives of new items are determined based on the expected utility and economic benefits to be received from the asset. Accordingly, useful lives for new items of PPE are assessed based on past experience and internal technical inputs.

Subsequent expenditure

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Derecognition

An item of PPE is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the item. Any gain or loss arising on disposal or retirement of item of PPE is determined as the difference between the sale proceeds and the carrying amount of the item and is recognized in the statement of profit or loss in the period in which the PPE is derecognized.

Notes to Financial Statements for the year ended March 31, 2022

E) Intangible assets

Intangible Assets are recognized initially at acquisition cost and subsequently carried at cost less accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight line basis over the estimated lives.

Intangible Assets consist of rights under licensing agreement and software licenses which are amortised over license period.

Gains or Losses arising from the retirement or disposal proceeds and the carrying amount of the assets are recognized as income or expense in the Statement of Profit & Loss.

F) Investment property

Investment property is the property either to earn rental income or for capital appreciation or for both but not for sale in ordinary course of business, use in production or supply of goods or services or for administrative purpose. Investment properties are measured initially at cost, including transaction costs, and subsequently carried at cost less accumulated depreciation.

Depreciation on Investment Properties are calculated on a straight-line basis using the rate arrived at based on the useful life estimated by the management. The estimated useful life of investment properties (buildings) as estimated by the Management is 60 years.

Investment properties are derecognized either upon disposal or when they are re-classified, permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period in which the property is derecognized.

G) Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset(s) or the arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

a) As a lessee

The Company, as a lessee, recognizes a right-of-use asset and a corresponding lease liability for its leasing arrangements, if the contract conveys the right to control the use of an identified asset for a period of time in exchange of consideration. The contract conveys the right to control the use of an identified asset if it involves the use of an identified asset and the Company has substantially all of the economic benefits from use of the asset and has right to direct the use of the identified asset. The cost of the right-of-use asset shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs incurred. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate.

For short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the lease term.

The Company has applied the practical expedient as set out in Paragraph 15 of Ind AS 116, which gives an option not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

Notes to Financial Statements for the year ended March 31, 2022

The Company has applied the practical expedient to recognize all the rent concessions received due to COVID 19, as income instead of a lease modification. This has been notified by the Companies (Ind AS) Amendment Rules 2020 and extended by the Companies (Ind AS) Amendment Rules 2021 for concessions received upto 30th June 2022.

b) As a Lessor

Rental income from operating leases is generally recognised on a straight-line basis over the period of the lease unless the rentals are structured to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases and is included in revenue in the Statement of Profit or Loss due to its operating nature. Leases with lease term of twelve months or less are considered as short-term leases.

H) Depreciation

Depreciation on PPE is provided on the Straight-Line Method (SLM) to allocate their cost, net of their estimated residual values over the estimated useful life. The Company has estimated 5% of the cost of PPE as the residual value for calculation of depreciation except for the buildings revalued on transition to Ind AS, where 5% of the original cost has been continued as the residual value. Depreciation is provided on the basis of life of asset as estimated by management which are equal to or less than as prescribed under the Companies Act:

Type of Asset	Useful Life under Schedule II	Useful Life as per management * (as technically assessed)
Building	30 Years	5 - 30 years
Plant & Machinery	15 Years	5 - 15 Years
Furniture & Fixture	10 Years	10 Years
Motor Vehicles	10 Years	10 Years
Office Equipment	5 Years	5 Years
Computer & Printers	3 Years	3 Years
Software & Servers	6 Years	3 - 6 Years

In case of Electrical Installation, Equipment and Laboratory Equipment, Management has estimated useful life to be 15 years, instead of 10 years prescribed in Schedule II of Companies Act, 2013. Each component of an item of property, plant and equipment with a cost that is significant in relation to the cost of that item is depreciated separately if its useful life differs from the other components of the item.

The useful lives, residual values and the method of depreciation of property, plant and equipment are reviewed, and adjusted if appropriate, at the end of each reporting period prospectively.

I) Impairment

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. An impairment loss is charged to the Profit and Loss Statement in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

J) Non-Current Assets Held for Sale

Non-current assets classified as held for sale are measured at the lower of carrying amount and fair value less costs of disposal.

Non-current assets are classified as held for sale if their carrying amounts will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such assets.

Notes to Financial Statements for the year ended March 31, 2022

Property, Plant and Equipment, Investment Property and Intangible Assets are not depreciated or amortized once they are classified as held for sale.

K) Foreign Currency Transactions

Transactions denominated in foreign currencies; if any, are recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate at the date of the transaction.

Monetary items denominated in foreign currencies at the year end, if any, are restated at year end rates. In case of items which are covered by forward exchange contracts, the difference between the forward rate and rate on the date of the contract is recognized as exchange difference. and the premium paid on options; if any, is recognized over the life of the contract.

Non-monetary foreign currency items; if any, are carried at cost.

Any income or expense on account of exchange difference either on settlement or on translation; if any, is recognized in the Profit And Loss Statement.

L) Financial Instruments

a) Financial Assets

Initial Recognition and Measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Financial assets are classified, at initial recognition, as financial assets measured at fair value or as financial assets measured at amortized cost.

Subsequent measurement

For the purpose of subsequent measurement financial assets are classified into two broad categories:-

- Financial Assets at Fair Value
- Financial Assets at Amortized Cost

Where assets are measured at fair value, gains and losses are either recognized entirely in the statement of profit and loss, or recognized in other comprehensive income.

A financial asset that meets the following two conditions is measured at amortized cost:-

- **Business Model Test:** The objective of the company's business model is to hold the financial asset to collect the contractual cash flows.
- **Cash Flow Characteristics Test:** The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through OCI:-

- **Business model test:** The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- **Cash flow Characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of interest on the principal amount outstanding.

Notes to Financial Statements for the year ended March 31, 2022

All other financial assets are measured at fair value through profit and loss.

All equity investments are measured at fair value in the balance sheet, with value changes recognized in the statement of profit and loss, except for those equity investments for which the entity has elected irrevocable option to present value changes in OCI.

Impairment of Financial Assets

The company assesses impairment based on Expected Credit Losses (ECL) model at an amount equal to 12 months expected credit losses, or, lifetime expected credit losses, depending upon whether there has been a significant increase in credit risk since initial recognition.

In accordance with Ind-AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on trade receivables and other advances. The Company follows 'simplified approach' for recognition of impairment loss on these financial assets. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

De- recognition:

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Company's balance sheet) when:

- the rights to receive cash flows from the asset have expired, or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:
 - (i) the Company has transferred substantially all the risks and rewards of the asset, or
 - (ii) the Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

b) Financial liabilities

All financial liabilities are initially recognized at fair value and, in case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities are classified as measured at amortized cost or fair value through profit and loss (FVTPL). A financial liability is classified as FVTPL if it is classified as held for trading, or it is a derivative or is designated as such on initial recognition. Financial Liabilities at FVTPL are measured at fair value and net gain or losses, including any interest expense, are recognized in statement of profit and loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in statement of profit and loss. Any gain or loss on derecognition is also recognized in statement of profit and loss.

Trade payables represent liabilities for goods and services provided to the Company prior to the end of financial period which are unpaid. The amounts are unsecured and are usually paid within twelve months of recognition. Trade and other payables are presented as current liabilities unless payment is not due within twelve months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

De- recognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another, from the same lender, on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability.

Notes to Financial Statements for the year ended March 31, 2022

The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

M) Inventories

Raw Materials and Packing materials, stores and spares are valued at lower of Cost and net realisable value. However, materials and other items held for use in the production of finished goods are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on a First In First Out (FIFO) basis.

Work-in-progress and finished goods are valued at lower of cost and net realisable value. Cost includes direct materials, labour, and a proportion of manufacturing overheads based on normal operating capacity. Cost is determined on a First In First Out (FIFO) basis.

Traded Goods are valued at lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to make the sale.

N) Revenue Recognition Sale of Goods

The Company derives revenues primarily from sale of manufactured goods & traded goods.

Revenue is recognized on satisfaction of performance obligation upon transfer of control of promised products or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products or services.

The Total Sales Revenue are netted off with the direct Sales Cost as per Ind AS 115 and Net Revenue From Operations are shown in the Profit & Loss Statement.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

Other Income

Interest income is recognized using effective interest rate method and on time proportion basis taking into account the amount outstanding and the interest rate applicable.

Dividend income is recognized when right to receive payment is established, the economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

Insurance claims are accounted for on the basis of claims expected to be admitted.

Rent income is recognized based on the mutual agreement between the parties on time proportion basis. Export Incentives under the "Duty Drawback Scheme" are accounted in the year in which the exports are made.

O) Employee Benefits

Short-Term Employee Benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits and are recognized in the statement of Profit and Loss as an expense at the undiscounted amount on an accrual basis.

Post-employment Benefits

Notes to Financial Statements for the year ended March 31, 2022

Defined Benefit Plans – Gratuity

The Company's liability towards Gratuity is a Defined Benefit Plan. In respect of this, the liability recognised in the Balance Sheet is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in 'Employee Benefit Expenses' in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. These are included in 'Retained Earnings' in the Statement of Changes in Equity.

Defined Contribution Plans – Provident Fund

Contributions under defined contribution plans payable in keeping with the related schemes are recognised as expenses for the period in which the employee has rendered the service.

Other Long-term Employee Benefits – Leave Encashment

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured annually by actuaries as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements gains or losses as a result of experience adjustments and changes in actuarial assumptions are recognised in the Other Comprehensive Income.

The obligations are presented as current liabilities in the Balance Sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

P) Borrowing Costs

Borrowing costs if any, include exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as a part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to the profit and loss statement in the period in which they are incurred.

Q) Income taxes

Income tax expense comprises of current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred taxes are recognized in statement of Profit and Loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

Current tax is measured at the amount expected to be paid to the tax authorities, using the applicable tax rate specified in section 115BAA, on the taxable income. Deferred Tax is computed using the Balance Sheet Approach. Deferred Income tax reflect the current period timing difference between taxable and accounting income for the period and reversal of timing differences of earlier years/period. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future income will be available except that deferred tax assets, in case there are unabsorbed depreciation or losses, are recognized if there is reasonable certainty that sufficient future taxable income will be available to realize the same.

Notes to Financial Statements for the year ended March 31, 2022

Deferred tax assets and liabilities are measured using the tax rates and tax law that have been enacted or substantively enacted by the Balance Sheet date.

R) Segment reporting:

The CEO monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements.

The operating segments have been identified on the basis of nature of products / service.

- a) Segment revenue includes sales and other income directly attributable / allocable to segments including inter-segment revenue.
- b) Expenses directly identifiable with / allocable to segments are considered for determining the segment results. Expenses which relate to the Company as a whole and not allocable to segments are included under unallocable expenditure.
- c) Income which relates to the Company as a whole and not allocable to segments is included in un-allocable income.
- d) Segment results include margins on intersegment sales which are reduced in arriving at the profit before tax of the company.
- e) Segment assets and liabilities include those directly identifiable with the respective segments. Un-allocable assets and liabilities represent the assets and liabilities that relate to the Company as a whole and not allocable to any segment.

S) Earnings per share:

Basic earnings per share is calculated by dividing the net profit or loss for the year after tax attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events, if any, such as bonus issue, bonus elements in a rights issue to existing shareholders, shares split and reverse shares split (consolidation of shares). For the purpose of calculating diluted earnings per share, the net profit or loss for the year after tax attributable to equity shareholders and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

T) Provisions, Contingent Liabilities and Contingent Assets

Provision is recognized in the accounts when there is a present obligation as a result of past event(s) and it is probable that there will be an outflow of resources required to settle the obligation and a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent Liabilities are disclosed unless the possibility of outflow of resources is remote. Contingent Assets are neither recognized nor disclosed in the financial statements.

U) Cash & Cash Equivalents

The Company considers all highly liquid investments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

38 Capital Management

Risk Management

For the purpose of company's capital management, equity includes equity share capital and all other equity reserves attributable to the equity shareholders of the company. The Company manages its capital structure and makes adjustments in light of changes in economic conditions or its business requirements. The Company's objectives are to safeguard continuity, maintain a strong credit rating and healthy capital ratios in order to support its business and provide adequate return to shareholders through continuing growth and maximise the shareholders value. The Company funds its operations through internal accruals. The management and the Board of Directors monitor the return on capital as well as the level of dividends to shareholders.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company includes within net debt, interest bearing loans and borrowings, less cash and cash equivalents.

As at March 31, 2022 and March 31, 2021, the Company has only one class of equity shares and has debt, consequent to such capital structure, there are no externally imposed capital requirements. In order to maintain or achieve an optimal capital structure, the company allocates its capital for distribution of dividend or re-investment into business based on its long term financial plans.

42 Financial Risk Management Objectives and Policies

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Risk Management Committee.

The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including deposits and loans and borrowings.

The company manages market risk through Risk Management committee, which evaluates and exercises independent control over the entire process of market risk management. The committee recommends risk management objectives and policies, which are approved by Risk Management and Board.

a Market Risk

Market Risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market Risk comprises three types of risk: Interest Rate Risk, Currency Risk and Other Price Risk, such as Commodity Risk. Financial Instruments affected by Market Risk include Loans and Borrowings, Deposits and FVTOCI Investments.

The sensitivity analysis in the following sections relate to the position as at 31 March 2022 and 31 March 2021.

The following assumptions have been made in calculating the sensitivity analysis:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31 March 22 and 31 March 2021.

The sensitivity of equity is calculated by considering the effect of any associated cash flow hedges at 31 March 2022 for the effects of the assumed changes of the underlying risk.

i) Interest Rate Risk

Interest Rate Risk is the risk that the Fair Value or Future Cash Flow of a financial instrument will fluctuate because of changes in market interest rates. In order to balance the company's position with regards to interest income and interest expense and to manage the interest rate risk treasury performs a comprehensive interest rate risk management.

The company is not exposed to significant interest rate risk as at the respective reporting dates.

Notes to Financial Statements for the year ended March 31, 2022

ii) Foreign Currency Risk

Foreign currency risk mainly arises from transactions undertaken by an operating unit denominated in currencies other than its functional currency. The Company is exposed to currency risk mainly on account of its import payables and export receivables in foreign currency. The major exposures of the Company are in U.S. dollars. The Company hedges its import foreign exchange exposure partly through exports and depending upon the market situations partly through forward foreign currency covers. The Company has a policy in place for hedging its foreign currency exposure.

The Company does not use derivative financial instruments for trading or speculative purposes. The Company manages its foreign currency risk by converting the foreign currency exposure into ₹ on the date of entering into the transaction."

The carrying amounts of the Company's financial assets including Other Current Assets and financial liabilities denominated in foreign currencies at the reporting date are as follows:

Particular	As at March 31, 2022		As at March 31, 2021	
	USD in Lakhs	₹ in Lakhs	USD in Lakhs	₹ in Lakhs
Trade Receivables	2.88	218.39	4.12	301.31

Net exposure (Assets-Liabilities)	14.52	1,100.40	(76.57)	(5,743.22)

The following table details the Company's sensitivity to a 1% increase and decrease in the functional currency against the relevant foreign currencies of all the companies in the Company.

1% is the sensitivity rate used when reporting foreign currency risk and represents management's assessment of the reasonably possible change in foreign exchange rates.

The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 1% change in foreign currency rates. A positive number below indicates an increase in profit and other equity where the respective functional currency strengthens by 1% against the relevant foreign currency. For a 1% weakening of the functional currency against the relevant currency, there would be an equal and opposite impact on the profit and other equity, and the balances below would be negative:

Credit Risk

Credit Risk arises from the possibility that the counter party may not be able to settle their obligations as agreed. To manage this, the company periodically assesses the financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends and analysis of historical bad debts and ageing of financial assets. Individual risk limits are set and periodically reviewed on the basis of such information.

Financial Assets are written off when there are no reasonable expectations of recovery, such as a debtor failing to engage in a repayment plan with the company. Where loans or receivables have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. When such recoveries are made, these are then recognized as income in the statement of profit and loss.

The company measures the expected credit loss of trade receivables based on historical trend, industry practices and the business environment in which the entity operates.

Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, Company treasury maintains flexibility in funding by maintaining availability under committed credit lines. Management monitors rolling forecasts of the Company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows. The Company assessed the concentration of risk with respect to refinancing its debt and concluded it to be low.

The following tables detail the Company's remaining contractual maturity for its financial liabilities. The tables have been drawn up based on the cash flows of financial liabilities based on the earliest date on which the Company can be required to pay:
